Profile

I have been programming in various fashions since I was 11. My first program was an emotional context AI built in Lego Mindstorm's proprietary GUI programming language. Ever since I have dabbled in HTML, Javascript, Python and CSS, ultimately graduating three months early with a certification in Full Stack Web Development in React JS and Flask as well as several databases. I have a passion for learning new things and get excited when I am presented with a challenging problem and push for a solution with driven intent.

Relevant Skills

- **Soft Skills:** Communication, detail oriented, adaptability, critical thinking, and Teamwork..
- **Technical Skills:** I have certified in IT support, as well as Javascript, ReactJS, Python 3 (including Flask), HTML5, CSS, JSON, Git, SQL, SCSS, Flexbox, CSS Grid and UX Design through Bottega Coding University. General Familiarity with Agile. I am currently early in the process of learning CyberSecurity, Python for Automation, and UX/UI design from Grow with Google.

Projects

- **Professional Site:** A full response React application that utilizes various aspects of Modern React to showcase my Portfolio and my professional Blog. Modern React concepts include Hook based state management (useState, useContext) and React Router 6. Hosted at coblexdevelopment.com
- **Coble X Diner:** A fully responsive React Application that showcases a completely original restaurant/ internet cafe idea developed from my personal dream of coding from inside my own internet cafe. Includes a context sensitive chatbot "Waiter". Utilizes React, SCSS, JS, State Management through Redux Toolkit, HTML5, and responsible dependency usage.
- **React Home Page:** A long term large application that is represented at the second Sprint by the professional site project. It is ultimately destined to be a personal workflow/ professional curation app utilizing multiple frameworks and API's to save time in the career development process.

Work Experience

- **Bottega University, Apprentice Teaching Assistant** 03/23-Now

Teaching Full Stack Development to Full time and Part time students in a Zoom environment. Includes adding information for updated content, arranging collaborative projects, and helping students navigate the psychosocial aspects of entering a new field with a new paradigm.

- **Rural and Remote, Volunteer Mentor** 01/23-Now

Guiding students through Coding curriculum as well as advising in career skills such as self-advocacy, interviewing, organization and self care in a remote work setting.

- **Self Directed, Volunteer Tutor** 01/23-Now

Assisting various adults get through several levels of education including full high school curriculums, GED programs and college courses. Current clients are pursuing a High school Diploma, and another is pursuing College Algebra.

Education

- **Full Stack Web Development, Certification** 09/22 - 03/23
Certification for Full Stack Web Development including Python 3, HTML5, CSS, SCSS, SQL, Javascript, React.js, Node.js, Flexbox, and CSS Grid.
- **Technical Support Certification** Certification 08/22 - 09/22
